

# Status

## Email Queue

Manage sending emails in a queue. Also works with the transcription of audio files with IBM Watson, Azure, or Google.

## Install Instructions

- Make sure to upgrade to the latest FusionPBX version
- Update the database structure
  - Advanced -> Upgrade -> Schema
- Update App Defaults
  - Advanced -> Upgrade -> App Defaults
- Run the following commands to install as a service

```
cp /var/www/fusionpbx/app/email_queue/resources/service/debian.service /etc/  
systemd/system/email_queue.service  
systemctl enable email_queue  
systemctl start email_queue  
systemctl daemon-reload
```

- or as a cron job

```
crontab -e  
* * * * * cd /var/www/fusionpbx && /usr/bin/php /var/www/fusionpbx/app/  
email_queue/resources/service/email_queue.php
```

## Default Settings

Be sure all **Email** category settings are configured properly within Default Settings, or emails will fail to send properly.
