

Status

Fax Queue

Manage sending FAX in a queue. Sending a new FAX will go into the queue as waiting. Status updated to sent once they have succeeded or failed after multiple attempts.

Install Instructions

- Make sure to upgrade to the latest FusionPBX version
- Update the database structure
 - Advanced -> Upgrade -> Schema
- Update App Defaults
 - Advanced -> Upgrade -> App Defaults
- Run the following commands to install as a service

```
cp /var/www/fusionpbx/app/fax_queue/resources/service/debian.service /etc/systemd/system/fax_queue.service
systemctl enable fax_queue
systemctl start fax_queue
systemctl daemon-reload
```

- or as a cron job

```
crontab -e
* * * * * cd /var/www/fusionpbx && php /var/www/fusionpbx/app/fax_queue/resources/job/fax_queue.php
```

Default Settings

Be sure all **FAX Queue** category settings are configured properly within Default Settings, or emails will fail to send properly.
